Plantronics T10 Headset Telephone

The T10 is a complete headset phone, offering your agents the convenience and increased productivity of hands-free operation. Convertible noise-cancelling headset can be worn over the ear, or over the head. Base has volume and tone controls, flash, redial, ringer volume, mute button with indicator light, on-line indicator light, and headset stand. It is line powered and requires no AC connection. One year warranty.

ITT2203 Ten Memory Single-Line Speakerphone

The ITT2203 is a basic speakerphone with excellent functionality. The ten one-touch dialing buttons can be programmed for direct dial to extensions, and direct line access for outgoing calls, or for other system functions as needed. It has a ringing indicator light, and flash, hold, and redial buttons. Includes receiver and speaker volume controls, and a data port that can be used for a local telephone answering machine or cordless phone. We can pre-program this phone to your needs and print appropriate button designation cards for easy operation upon request. It is line and battery powered (2 AA) and requires no AC connection. Standard color is black. One year warranty.

Basic 2500 Red Single-Line Desk Telephone

An optional no-frills phone in brilliant red, with a loud metal bell ringer. For use where a distinctive and simple phone is required. The hook switch may be used for "flash" for hold and call transfer. Includes volume-control handset, and a data port that can be used for a local telephone answering machine or cordless phone. It is line powered and requires no AC connection. Two-year warranty.
