

Telephone installation tool kits for field-deployable telephone systems

Northmark
Communications
Field Deployable Telecom Solutions

Basic Tool Kit

- Included standard with every system
 - Slip joint pliers
 - Diagonal cutting pliers
 - Needle-nose pliers
 - Adjustable wire strippers
 - 6" adjustable wrench
 - #2 Phillips screwdriver
 - Medium flat blade screwdriver
 - Zippered nylon carry bag

Advanced Installer's Kit

- Optional for all systems
 - Telephone "butt" test set
 - Tone generator
 - Inductive tone probe
 - Telephone "can" wrench
 - 66/110 punch down tool
 - Modular crimper
 - "Banjo" test adapter
 - RJ-11 plugs (10)
 - 2 9v batteries
 - Zippered nylon carry case

The **Advanced Installer's Kit** is strongly recommended where installations are to be made in unfamiliar buildings or those with questionable telephone connections. Included equipment allows testing for dial tone and tracing wires and cables, as well as connection to standard 66 and 110 type telephone blocks.
